

THE ENGRAVER FOR INDUSTRIAL AND COMMERCIAL ESTABLISHMENTS. ITS THE FASTEST WAY TO MARK AND IDENTIFY FOR YOUR BUSINESS.

- Mark and identify tools, rating plates.
- Suitable for most materials.
- Perfect for marking aluminium labels and plates.

This engraver is powered by an AC motor, so make sure that the current you are using is the same as shown on the top of the engraver housing, next to the on-off switch. Hold the engraver at a slight angle as you would normally hold a pencil. Do not press down hard while engraving. Using a light touch, guide the point over the work somewhat slower than you would normally write. Use the dial on the side of the engraver housing to control the stroke length and the depth of engraving.

- A. Handy hanger for convenient storage.
- B. On-off switch.
- C. Calibrated stroke adjustment dial.
- D. Pencil type grip.
- E. Easily replaceable carbide point.
