

INCREDIBLE PRINT CLARITY AND EXCEPTIONAL DURABILITY ARE COMBINED WITH BUSH BIRD & BUG LABELS AND DISPLAYS. IDENTIFY, INFORM AND EDUCATE FROM OUR EXTENSIVE LIST OR CREATE YOUR OWN.

Bush Bird & Bug Labels

Bush Bird & Bug botanic labels use our MetalPhoto print process to create timeless images by embedding a silver-halide photographic image below the anodic layer of the aluminium.

Sub-Surface Printed Anodised Aluminium

What is this stuff?

1 Anodic Layer
A glass-clear, sapphire-hard anodised layer resists chemicals, paint, abrasion and dirt.

2 Sealed Image
The printed graphics are trapped deep in the pores of the anodised aluminium.

3 Base Aluminium Layer
The corrosion resistant aluminium base will not peel, crack or delaminate.

Our labels are made to endure long-term exposure to full sun, abrasion, paint and chemicals, with TuphMount Display Stands ready for ground, wall* or tree installation.

* By 'wall' we mean any immovable object you can drill a hole in. Some on-site assembly is required.

- Over 450 native and exotic species listed, including birds and insects.
- Beautifully detailed illustrations, use our carefully researched text or supply your own.
- It's a growing collection, we'll subsidise the addition of unlisted species by 50% in most cases.**
- ** Some exotic, hybrid or rare species we are unable to subsidise.
- Little or no maintenance required, even after decades a quick wipe removes growths, grime, paint or marker.
- DIY mounting – no problem! We call this the **YouMount**. The same standard sizes, but printed on heavier gauge metal with punched holes ready for you to attach to anything.
- Mark your own labels with just a Biro. DeBoss labels and tags are a low-cost but permanent DIY solution.
- Discounts for Schools and Forest & Bird Members.
- Our illustrated coasters make the perfect gift. Sets of 4 or 6, cork backed. Iconic native species such as Clematis, Kowhai, Totara, Kauri, Pohutukawa and Rimu selected from our list.

TuphMount Display Installation Secure and very easy to install.

Ground, tree and wall*.

Concrete with Anchor Rods
1/2 leg buried (recommended)
1/3 leg buried (minimum)

Rammed Earth with Anchor Rods
2/3 leg buried (recommended)
1/2 leg buried (minimum)

TuphMounts can be secured with concrete, packed earth or both. **Concrete.** Install as per any small post with depths as above, or to save on concrete; fit the anchor rod(s) then place the display in an ice-cream container. Fill with instant concrete and leave to set. Remove the container then bury TuphMount to depth as above. **Packed Earth.** To improve security deeper holes are required as above. Ram earth well, a few rocks on top of the anchor rods improve stability.

TREE
Ready to attach to tree

Drill a 3mm hole to around 70mm depth. Fit bush and spike to front, star washer*, spring then flat washer to rear. Drive in the spike to approximately 70mm.

WALL*
Ready to attach to wall/structure

Drill holes to suit your countersink fixings, attach TuphMount to wall/structure ensuring countersinks are not proud. Thoroughly clean mounting face with meths. Remove paper adhesive liner, firmly press on the label.
