

Our sub-surface print process is the key to our durability. Weather-proof, heat, solvent and scratch resistant images sealed in anodised aluminium.

**MetalPhoto**

**AliChroma**

## MetalPhoto

MetalPhoto print technology embeds a silver-halide photographic image below the anodic layer of the aluminium offering superb print clarity. Single sided print, colour is restricted to black only. The origination charges are estimated only and apply to the initial order & subsequent alterations or additions only.

**SIZE:** 88 x 50mm **MATERIAL:** 0.50mm

## AliChroma

AliChroma is sub-surface printed using a high resolution digital process. The resulting 25 micron thick glass-clear, sapphire-hard anodic layer withstands abrasion, paint and chemicals. Single sided print, spot colour and 4 colour CMYK print available. The origination charges are estimated only and apply to the initial order & subsequent alterations or additions only.
